

BIOLOGY MINOR

Biology in the broadest sense is the study of life. It is a diverse subject requiring an understanding of life ranging from molecules to ecosystems. Students synthesize that knowledge to understand the living world, a world that is both remarkably unified and wonderfully diverse. Biology Minors explore the breadth of the field, to supplement and enhance the understanding of their primary major.

Requirements

Program Requirements

Students must achieve the following program requirements for all courses listed under Program Requirements and Program Required Courses for the Biology minor.

Minor Credits: 20

Minimum Grade: C

Program Required Courses

Code	Title	Credits
BIO 1115	Global Problems, Scientific Solutions	4
BIO 1125	Foundations in Biology	4
	Elective in Animal Diversity	4
	Elective in Ecology and Field Studies	4
	Elective in Human, Cellular & Molecular Biology	4
Total Credits		20
