

BUSINESS MANAGEMENT, B.A.

The goal of the Business Management major is to prepare students for managerial careers in a wide range of for-profit and not-for-profit organizations. The major emphasizes the human dimensions of business management and teaches students how to apply theoretical concepts to the solution of real world problems. In addition to completing the required business management courses, students may focus on specific areas of interest through their choice of business management electives.

Students completing the Bachelor of Arts in Business Management may also elect to complete a concentration in Healthcare Administration (p. 1).

Learning Outcomes

The student completing the Business Management major will be able to:

1. Demonstrate the ability to use accounting, finance, human resources, information technology, and marketing knowledge to support managerial decision-making.
2. Demonstrate problem-solving skills, by using critical thinking and quantitative business analysis, in creating and implementing strategic and operational plans appropriate for a business or nonprofit organization.
3. Apply required skills in developing effective group and team dynamics associated with leading, motivating and inspiring teammates to successfully complete a major project.
4. Demonstrate effective oral and written communication skills appropriate for a manager.
5. Understand how global issues and diversity will affect future work.
6. Apply ethical behaviors in addressing challenges encountered as managers.
