

# GERONTOLOGY CERTIFICATE

The Gerontology Minor/Certificate Program provides students with a strong foundation in gerontology, preparing them to work with and advocate for older adults. The program is structured so students are able to individualize their courses of study to fit their career needs. Typically, degree-seeking students choose the minor and non-degree-seeking students choose the certificate. The requirements for both the minor and the certificate are the same (equivalent of 20 credits).
