BUSINESS AND TECHNOLOGY STUDIES

Programs

The Management and Business Studies Department offers this program:

- Business and Technology Studies, B.A. (http://catalog.css.edu/programs-az/stender-business-leadership-professional-studies/business-technology-studies/business-technology-studies-ba/)

This major provides students an opportunity to explore a wide range of topics drawn from the disciplines of Management and Computer Information Systems or to arrange an individualized course of study in fields represented by the majors offered within the Stender School of Leadership, Business, and Professional Studies.

Whereas a degree in Business and Technology Studies may prepare a student for entry-level employment, students should be aware that this school major may not provide sufficient depth of preparation for admission to a graduate program or specialization in one of the management or computer information disciplines. Students who wish to earn this school major should meet with the Dean of the Stender School to evaluate the appropriateness of the degree for their career goals.

The school major is generally intended for students who are not seeking a baccalaureate degree in any other program within the Stender School. Therefore, the school major is not offered as a second major.

Application

A student seeking to earn a B.A. in Business and Technology Studies should first schedule an appointment with the Dean of the Stender School of Leadership, Business, and Professional Studies or a designated advisor to discuss the appropriateness of the school major and a proposed course of study. Students submit the Application to Major form and an essay to the Dean. The essay should explain how earning a B.A. in Business and Technology Studies advances the educational and career goals of the student.
